

# Environmental Reporting

Gain insights and ensure compliance by embedding environmental, social and energy objectives into your daily operations.

The best way to achieve your environmental goals is through consistent review, evaluation, and improvement of your environmental performance. TenForce Environmental Reporting is right for you when you are looking to:

- Improving energy efficiency
- Keeping track of your waste, water and resources
- Comply with regulations
- Reducing environmental impact from emissions

## Keep track of energy consumption

You can keep track of your energy consumption in one view. This includes fuels (gas, liquid, solid), electricity, steam, hot water and oil, and renewables. The dashboard gives you a comprehensive look on how you are performing in these areas.

## Efficient water and waste management

TenForce Environmental Reporting allows you to efficiently manage water and waste. You can track where your water comes from and where the waste water goes afterwards. The module also features chemicals and waste management.

## Integrated reporting tools

The platform is equipped with standard reporting tools and a certified interface for multifaceted analyses. Other TenForce modules such as Risk or Audits Management, can be easily integrated with Environmental Management.

## Ensure compliance with environmental standards

TenForce software is compliant with the ISO 14001 standard, which enables you to meet all necessary regulatory guidelines. This way, environmental risks of business operations are controlled and reduced.

# The TenForce Environmental Reporting Process

## Collect data

- ✓ Capture all data
- ✓ Identify and record environmental risks & impact
- ✓ Track resources, emissions and waste

## Set objectives

- ✓ Set goals and objectives
- ✓ Comprehensive overview of activities and actions
- ✓ Notify relevant users on actions or findings

## Take action

- ✓ Take preventive or corrective action
- ✓ Assign ownership by Role, Group or Individual
- ✓ Task reports

## Reporting & analysis

- ✓ Enable flexible reporting
- ✓ Track and measure environmental data against KPI performance
- ✓ Report and analyse to ensure compliance

What TenForce Environmental Reporting will do for you:

- Providing a clear view on activities that might impact environmental concerns
- Gaining insights and assuring compliance by embedding the environmental, social and energy expectations into the daily operations
- Collecting data on energy consumption, waste, resources,...
- Full compliance and set-up with ISO 14000 / 14001 standard in mind
- Integration with other activity areas (incident management, audits,...)
- Upholding safety standards by using resources responsibly and safeguarding the environment
