Risk Management

**Identify, analyse, and eliminate to the highest degree any risk
that might constitute a danger to the health and safety of your workers.**

Risk Management is about identifying, assessing and responding to risk factors within your business. Well-executed Risk Management reduces both the possible occurrence and the potential negative impact of a risk.

TenForce Risk Management is an easy to use, state-of-the art, 100% paperless solution. It is the perfect software for you if you are looking to:

- step away from data scattered in emails, multiple paper documents, aging systems and spreadsheets
- find a way to deal with hazardous environments where risks and incidents are waiting to happen
- avoid loss of business due to unexpected downtime related to unforeseen risks and incidents
- prevent uncertainty over satisfactory EHS compliance during audits

Identify, analyse and mitigate risks

✓ Do basic or advanced risk analyses
✓ Use several Risk Management methods
✓ Mitigate and qualify risks (pre and post risk qualification)
✓ Identify and record safety issues, near-misses or data breaches

Logical workflows

✓ Classify and assess risks
✓ Approval & validation workflow

Take corrective and preventive action

✓ Launch and follow up actions, tasks or even full projects
✓ Assign ownership by Role, Group or Individual
✓ Central overview from all sources and modules

Clear audit trail

✓ Create a transparent overview of the company's risk management KPIs
✓ Keep a clean audit trail for regulators
✓ Improve data traceability
✓ Comply with regulatory requirements: ISO, OSHA and others
✓ 24/7 data access.
