TENFORCE ✕ MANUFACTURING

EHSQ and ORM Software for Safety Professionals and Plant Managers

Mitigate risk without sacrificing efficiency

Streamline incident and risk management

Quickly identify hazards, report incidents, investigate root causes, and implement corrective and preventive measures to ensure workplace safety and minimize disruptions. Standardize risk management processes for performance benchmarking across your organization.

Keep a clean audit trail

Achieve complete oversight of your operations through a unified platform. Keep a clean audit trail with automated processes. Systematically collect, analyze, and report data for comprehensive documentation and regulatory compliance.
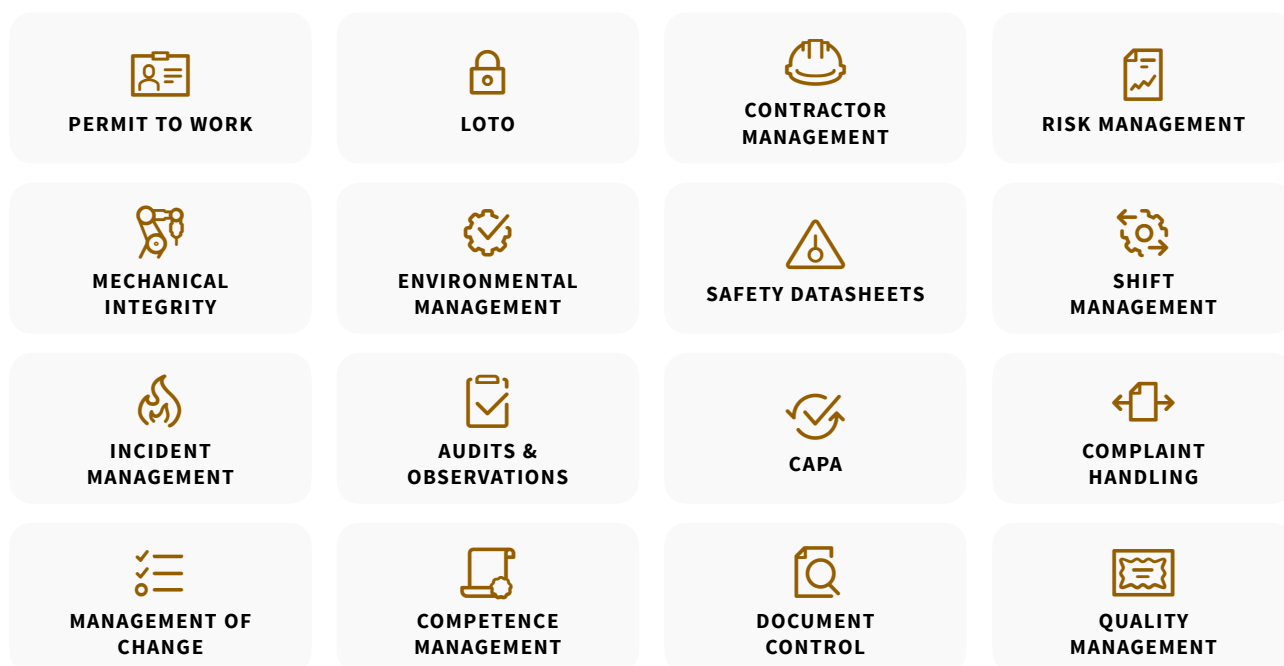

Boost operational efficiency

Automate workflows, streamline task assignment and tracking to minimize downtime, maximize productivity, and enhance operational efficiency. Automatically notify relevant parties about hazards or near misses for swift resolution and improved workplace safety.
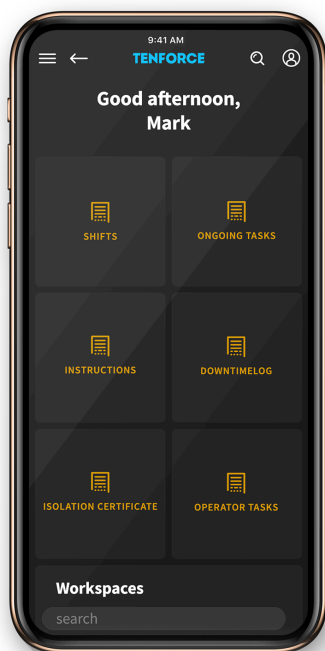

Gain complete operational oversight

Analyze incident and production data organization wide to gain insights into performance metrics, compliance status, and improvement areas. Customizable dashboards and reports improve visibility, leading to informed decision-making, and proactive risk management.

One integrated view of your operational reality
