Competence Management

Create real-time and predictive inventories of your workforce's capabilities

Automate certification management

Keep your team compliant and qualified by automatically tracking and renewing certifications. Get timely reminders and updates to avoid costly lapses.

Personalized training paths

Assess employee skills, pinpoint competence gaps, and implement tailored development plans. Place employees at the heart of their development journey to make training more effective.

Make data-driven decisions

Collect, centralize, and analyze employee data. Real-time dashboards let you track progress, identify skills gaps, and make data-driven decisions on training and development needs.

Scalable for complex operations

Track competencies across multiple locations and regulatory jurisdictions without missing a beat. Whether you manage a small team or a multi-site operation, our system scales to meet your needs.

# Unlock Your Team's Potential: The TenForce Process

1. Skills assessment

2. Tracking training programs

3. Closing the loop

✓ Set up profiles for each employee that include details like their department, manager, qualifications, certifications, and skills

✓ Group employees based on job titles, roles, departments, and locations. Then, assign the necessary qualifications and certifications for each group

✓ Automatically identify skill gaps and generate targeted training programs, complete with relevant tests and qualifications

✓ Centralize training records so they are accurate and accessible when you need them

✓ Automatically notify employees of assigned training tasks and track their progress

✓ Connect training tasks to training material or your LMS

✓ Offer evaluations or tests in different formats, such as oral, written, checklists, etc

✓ Award qualifications with set validity periods

✓ Schedule refresher training and certification renewals automatically

✓ Track how much time each department, individual, or topic spends on training

✓ Create compliance-ready reports with instant data visualization for stakeholders

✓ Understand competency levels across the organization and assign resources where they're needed most.

✓ Integrate with CAPA, Risk Management, Audits, and more
